Recomendações

Não emprestamos, separadamente, exemplares que estão incorporados nos kits didáticos (Vertebrata, Peixes, Mollusca ou Herpetologia). O empréstimo desses exemplares implica no empréstimo do kit didático.

Os kits devem ser transportados com a tampa voltada para cima, evitando o vazamento do líquido nos frascos, acidentes e/ou danos ao material.

É vedada a abertura dos frascos e a manipulação dos espécimes, pois pode ocasionar a evaporação do conservante e comprometer a preservação dos exemplares.

Em caso de acidentalmente entrar em contato com o líquido conservante (álcool 70 ou glicerina, não tóxicos) presente nos frascos, lavar a parte atingida abundantemente com água corrente.

Espécimes doados por pesquisadores, professores e colaboradores.
